## EDUCATION

**Texas A&M University, Corpus Christi**

January 2022 – August 2023

Master of Science, Computer Science and Engineering

**ANNA University, Chennai, India**

August 2014 - May 2019

Bachelor of Engineering, Computer Science and Engineering

## TECHNICAL SKILLS

**Programming languages:** NodeJS, React JS, C#, .Net, MVC, Dapper, Shell Scripting, Ansible, Jenkins, Maven, Java, Android, PHP, JavaScript, RPA

**Database:** MySQL, Oracle SQL, SQLite, SQL Server

**Tools:** GIT, Linux, Jenkins, Visual Studio, Amazon's AWS

## EXPERIENCE

**Senior Engineer - Project Management, Accenture, India**

Oct 2019 – Dec2021

- Led cross-functional teams in the planning, execution, and delivery of technical projects project to merge six applications into a big data platform within ten sprints.
- Defined project scope, goals, and deliverables in collaboration with stakeholders, ensuring alignment with the Project Administration office's objectives in executing the digital strategy by contributing to large-scale planning efforts that aligned with business objectives, resulting in 35.6% increase in digital engagement.
- Developed detailed project plans, including timelines, resource allocation, and budgets, collaborated with peers, colleagues, and mid-level managers to address challenges and achieve goals, fostering productive partnerships that enhanced project outcomes by 40%.
- Coordinated and managed technical resources and led 5 projects, providing direction to junior staff on less complex digital initiatives, ensuring adherence to best practices and project milestones.
- Worked closely with project administrators to identify and resolve technical issues. Reducing pending tickets by 60% in 2 sprints
- Collaborated directly with plant operations and technical functions to address project-related technical challenges and helped in removing road blocks to reduce project execution time by 23%.
- Conducted regular project meetings to track progress, identify risks, and implement corrective actions
- Communicate project status, issues, and risks to stakeholders, including senior management and clients regularly and kept project status active.
- Conducted cost analysis and estimate expected costs for technical projects and presented budget forecasts
- Ensured projects comply with industry standards, regulations, and best practices
- Provided technical guidance and support to team members throughout the project lifecycle
- Performed risk assessments and develop mitigation strategies
- Fostered strong relationships with internal and external stakeholders, including vendors and clients
- Advocated for new technical projects, programs, and systems within the organization
- Analyzed large data sets within minutes by using data mining techniques for various segments and projected the results in Power BI dashboards, saving 500+ man-hours and the results were 95% more accurate than manual analysis.
- Performed web research from competitor websites and new market studies that aided in the product roadmap creation and automated this process to 60 mins which earlier took days.
- Improved existing article section by implementing a web app sourced via CDN leading to a 30% decrease in content load times and increase in revenue by 20%.
- Orchestrated team for code improvements using Sonar Cube, yielding 20% improvement in code quality and 30% reduction in app size.

## PROJECTS

**Sound For Deaf and Dumb People**

- Developed a NLP Voice recognition for deaf people and Mind Speller device for Dumb people to speak their thoughts to the world. It reduced the cost of commercial hearing aid up to 70%.

**Flexipay: A secure payment system in Low Network Areas and During Natural Disaster**

- Developed a Adhoc network and an Android application to aid payment in low network zones. This temporary set up increased the coverage from 10% to 60%.

**Improving Lifetime of Phase Change Memory**

- It discusses the various techniques to enhance the lifespan of Phase Change Memory.

**How Does it Sound? Generation of Rhythmic Soundtracks for Human Movement Videos**

- Designed a highly available collaborative based on Association of rhythm with human movements (Video2Rhythm), 2) Generation of drum track from rhythm (Rhythm2Drum), 3) Adding instruments to the drum track (Drum2Music). The accuracy of this pr6oject was 89%.
