

VENKATESH ANANDAN

(832) 821-3727 | venkatesh.anandan@hotmail.com | linkedin.com/in/venkatesh-anandan-572453351

EDUCATION

Texas A&M University, Corpus Christi

Jan 2022 – Aug 2023

Master of Science, Computer Science and Engineering

ANNA University, Chennai, India

Aug 2014 - May 2019

Bachelor of Engineering, Computer Science and Engineering

TECHNICAL SKILLS

Languages: Java, JavaScript, C#, PHP, Shell Scripting

Frontend: React.js, HTML5, CSS3, Bootstrap

Backend: Node.js, .NET, Java/J2EE

Frameworks & Tools: MVC, Dapper, Android SDK, RPA

Cloud & DevOps: AWS, Jenkins, Ansible, Maven, Git, SonarQube

Databases: SQL Server, MySQL, Oracle SQL, SQLite

Tools & Platforms: Linux, Visual Studio, Power BI, Data Mining

EXPERIENCE

Software Engineer, Maxima Group Inc, USA

Sep 2024 – Present

- Develop and maintain enterprise full-stack applications using React.js, Node.js, J2EE, and SQL Server.
- Design and optimize SQL queries, stored procedures, and backend processes, improving application responsiveness and OLAP reporting.
- Developed CDN-based architecture reducing load time by 30% and increasing digital revenue by 20%.
- Collaborate with offshore teams and stakeholders to deliver enhancements, reports, and production support on time.
- Built Power BI dashboards using data mining, saving 500+ man-hours annually and improving reporting accuracy by 95%.

Software Engineer, Kivyo Inc, USA

Oct 2023 – Sep 2024

- Engineered reusable infrastructure automation tools and scripts supporting distributed production cluster environments.
- Developed CI/CD pipelines and automated test suites, improving deployment reliability and accelerating release cycles.
- Configured and optimized server images and deployment environments, system stability and operational efficiency.
- Directed SonarQube-driven code refactoring initiatives that improved code quality by 20% and reduced application size by 30%.
- Collaborated with cloud engineering teams to support Agile delivery cycles and create technical documentation aligned with evolving product requirements.

Application Development Senior Analyst, Accenture, India

Oct 2019 – Dec 2021

- Led cross-functional teams to consolidate six legacy applications into a unified Node.js and AWS-based big data platform, improving scalability and data accessibility.
- Built automated competitor and market research tools, reducing research turnaround time from several days to under 60 minutes.
- Reduced pending support tickets by 60% within two sprints through rapid issue resolution and workflow optimization.
- Conduct code reviews, unit testing, debugging, and technical documentation to ensure high-quality software delivery.
- Translate business requirements into technical solutions while contributing to system design and performance tuning.

Technical Projects

Sound for Assistive Communication | Python, TensorFlow, Signal Processing

- Developed an NLP-based voice recognition and “Mind Speller” communication system for speech- and hearing-impaired users
- Reduced cost of comparable assistive solutions by approximately 70% through optimized software-based processing.

FlexiPay | Offline Disaster-Recovery Payment System | Android SDK, Java, Ad-hoc Networking

- Built a secure Android-based payment platform for low-connectivity and disaster-recovery environments and increased functional network coverage from 10% to 60% using decentralized ad-hoc networking architecture.

Video2Rhythm | AI-Based Music Generation | Python, TensorFlow, OpenCV, MIDI Processing

- Designed a multi-stage machine learning pipeline (Video2Rhythm → Rhythm2Drum → Drum2Music) to generate synchronized soundtracks for human motion videos & achieved 89% accuracy in rhythm detection and audio synchronization.

Phase Change Memory Optimization Research | Computer Architecture, Memory Systems

- Researched optimization techniques to improve lifespan, efficiency, and reliability of Phase Change Memory (PCM) systems.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Designing and Implementing Microsoft DevOps Solutions (AZ-400)
- Developing ASP.NET MVC Web Applications (70-486)
- Programming in C# (70-483)
